

Corporate profile

Messina Electronics, a member of the Allied Technologies (Altech) Group, is a principal designer, manufacturer and distributor of digital electronic and micro-processor based electronic products and systems for Government, commerce and industry. The company's systems are aimed

at a wide range of applications including industrial process control, industrial automation, process monitoring and equipment status applications, data communications, computerised weighing and computerised instrumentation. Messina is also involved in the design and development of system

and applications software for industrial and commercial applications and the manufacture of high-technology electronics products, including data capturing and receipting terminals.

As a member of the Altech Group, Messina is in a position to offer customers a comprehensive service in the electronics industry both locally and abroad. Altech is one of a handful of high technology companies under South African control and involved in all aspects of electronics and telecommunications manufacture.

In addition to its access to Altech Group resources, Messina has its own design, sales and manufacturing facilities at Elandsfontein, near Johannesburg, which offers customers a reliable all-round "turn-key" capability for customised electronic products on either a one-off or a mass-produced basis.

An important aspect of the Messina operation is the Company's maintenance division which offers comprehensive after-sales service on a nationwide basis.
